"HEALTH ACT."

November 19th, 1932.

PURSUANT to the provisions of subsection (29) of section 7 of the "Health Act," R.S.B.C. 1924, His Honour the Lieutenant-Governor in Council has been pleased to approve of the following regulations:—

PROVINCE OF BRITISH COLUMBIA.

"HEALTH ACT."

British Columbia Provincial Board of Health  
Minimum Requirement of Shell-fish Control  
Measures and Certifications for Shippers.

By arrangement with the United States Government, the same regulations are applicable in both countries.

1. *Shell-fish defined.*—For the purpose of these regulations the term "shell-fish" is hereby declared to mean and include oysters and all varieties of clams.

2. *Growing Areas*.—No shell-fish shall be taken from any waters except from such grounds or growing areas as have been approved by the Provincial Board of Health:

Provided that the removal of shell-fish from areas not approved by the Provincial Board of Health of British Columbia having jurisdiction over shell-fish sanitation shall be permitted for the purpose of relaying in approved waters only during the closed season for marketing and not less than fifteen days prior to the opening of the next marketing season:

Provided further that in special circumstances, when the rigid application of the provisions of this section would result in serious loss to the owners of shell-fish permission may be granted by the Provincial Board of Health of British Columbia having jurisdiction over shell-fish sanitation for the removal of shell-fish from moderately polluted waters during the open season and to market them after relaying in a large body of clean water, but only under the following conditions:—

- (a.) That such permission be granted only to individuals known to be entirely responsible and trustworthy, and only under special permit. (It is recommended that such individuals be bonded, the bond to be forfeited in case of any violation of the conditions of the permit.)
- (b.) That such special permit shall be issued only for removal from privately owned or leased beds which are not exposed to excessive pollution.
- (c.) That the shell-fish be relaid in a designated area of clean water for such period as may be prescribed by the Provincial Board of Health having jurisdiction, having due regard to the degree of pollution of the original beds, but *in no case* for less than seven days.
- (d.) That the temperature of the water during the period of relaying be not less than 60° F.
- (e.) That the removal and relaying shall be under the immediate and constant supervision of a representative of the Provincial Board of Health of British Columbia having jurisdiction over shell-fish sanitation.
- (f.) That subsequent removal from the clean area, for sale or shipment, shall be made only under special permit granted by the Provincial Board of Health of British Columbia having jurisdiction over shell-fish sanitation.
- (g.) That when the period of relaying is less than fifteen days the Provincial Board of Health of British Columbia having jurisdiction shall require such bacteriological examination as may be necessary to establish that the shell-fish conform to accepted standards of purity.

3. *Floating*.—Shell-fish shall not be “floated,” stored, or cleansed in water the standard of purity of which is not at least as rigid as that prescribed for growing areas or beds.

4. *Boats*.—All boats used in the taking and handling of shell-fish shall be kept in such a state of cleanliness and repair that shell-fish hauled or stored thereon shall not be subject to contamination by bilge-water, through leakage of polluted water, or by other means. Decks, holds, or bins used for storage on boats shall not be washed with polluted water. Reasonable precautions shall be observed by fishermen while boats are in waters over shell-fish grounds to prevent the pollution of such grounds through the discharge of human waste.

5. *Storage*.—Shell-fish held in storage must be so kept at all times that they will not become contaminated.

6. *Records*.—Every person, firm, or corporation who conducts any wholesale business of buying, selling, or shipping shell-fish shall keep an accurate daily record which shall show the names and addresses of all persons from whom lots are received, the source of each lot, and the names and addresses of all persons to whom lots are sold or shipped. Such records shall be open to inspection at any time during business hours by any duly

authorized representative of the Provincial Board of Health having jurisdiction over shell-fish sanitation.

## 7. *Shucking and Packing Plants*.

### I. *Construction*.

- (a.) *Lighting and ventilation* shall be adequate in all parts of the building used.
- (b.) *Washing and packing rooms* shall be separate from shucking-rooms. They shall also be so constructed throughout as to permit easy and thorough cleaning and to afford adequate protection against flies.
- (c.) *Floors* shall be so constructed that they may be easily and thoroughly cleaned, and that drainage of all water therefrom shall be complete and rapid.
- (d.) *Storage-bins or storage-rooms* for shell stock shall be so constructed as to permit easy and thorough cleaning and draining.
- (e.) *Shucking-benches* shall be of an approved sanitary type. Such benches, and walls immediately adjacent thereto to a height of 2 feet above the benches, shall be of smooth material and so constructed as to be easily and thoroughly cleaned.
- (f.) *Sanitary toilets*, which shall be separate from shucking and packing rooms, must be provided for employees. If a privy is used it shall be of a sanitary type, constructed and located under the approval of the Provincial Board of Health of British Columbia.
- (g.) *Refrigeration-rooms or ice-boxes* for the retention of shell-fish must be so constructed as to permit easy and thorough cleaning. It is recommended that the floor of the refrigeration-room be constructed of concrete and that the ice-box have an impervious lining.

### II. *Equipment*.

- (a.) *Water*.—The plant shall be provided with an abundant supply of water, preferably under pressure, from a source approved by the Provincial Board of Health.
- (b.) *Hot Water*.—Hot water in sufficient amount for all purposes shall be available when the plant is in operation.
- (c.) *Lavatories*, with running water, shall be provided, together with soap and individual towels.
- (d.) *Utensils*.—Shucking-pails, measures, skimmers, and colanders, tanks, tubs, and paddles shall be made of non-corrosive, non-rusting, smooth, impervious material, and constructed in such manner as to eliminate grooves, seams, and cracks where food-particles will collect. All seams and joints shall be well filled with solder and dressed to a smooth surface. The handles of opening-knives should be so constructed as not to contain cracks and crevices which would retain food-particles and slime.

### III. *Operation*.

- (a.) *General Cleanliness*.—During the operating season the plant shall be used for no purpose other than the handling of shell-fish or other sea-foods. Material foreign to this particular business shall not be stored within the operating part of the plant. All abandoned equipment should be removed from the plant, and the floors in every way kept clear for thorough cleansing. The unoccupied portion of the storage-bins, the shucking-benches, and all the floors shall be swept and flushed with water of an approved quality at least once a day, at the completion of the day's run, until they are thoroughly clean. The use of polluted water for flushing or cleansing purposes shall not be permitted. A safeguard recommended is that of following the cleansing with a thorough flushing with scalding water or a solution of calcium or sodium hypochlorite of approved strength. This treatment is particularly advisable in the

case of shucking-benches. Refrigeration-rooms or ice-boxes shall be washed out and scalded once a week, or more often if necessary. Once a week the cleansing shall include the washing of walls.

- (b.) *Personal Cleanliness*.—All employees shall wash their hands thoroughly with running water and soap on beginning work and after each visit to the toilet. Signs to this effect shall be posted in conspicuous places in the plant by the operator. Gloves or other protection for the hands shall be of such material as can be easily and thoroughly cleaned.

- (c.) *Sterilization*.—An adequate supply of boiling water shall be available for the sterilization of utensils. All utensils and tools, such as opening-knives, shucking-pails, measures, skimmers, colanders, tanks, tubs, and paddles, which come in contact with the shell-fish shall be thoroughly scoured until clean, and then sterilized by steam in a steam chamber or box, or by boiling water. Such sterilization may be carried out before beginning work or at the close of the day if the articles are stored overnight so as not to become contaminated. Returnable shipping-cans must be cleaned and sterilized by steam prior to refilling and non-returnable cans shall be rinsed with hot water before filling. The use of shipping-containers other than metal for shucked stock is not approved.

- (d.) *Floor-shucking* shall not be permitted. Floors used by shuckers shall not be used for the storage of shell-fish or for the retention of shucking-pails. Where shell-fish are stored in the shucking-room, adequate protection shall be provided for the storage-space to prevent possible contamination from wash-water, wastes, and from the feet of the employees. Shucking-pails shall be so placed as to exclude the drippings from shells and from the hands of the shuckers.
- (e.) The "nesting" of empty pails shall not be permitted while the plant is in operation.

- (f.) *Refrigeration*.—The cooling of shucked shell-fish shall be effected as quickly as possible after the shell-fish are shucked. For the refrigeration of shucked stock outside containers shall be provided for ice, and no ice or other foreign substances shall be allowed in contact with the shell-fish. A temperature of 50° F., or below, but above freezing, shall be maintained in refrigerators where shucked shell-fish are stored.

- (g.) *Washed Shucked Stock*.—Shucked shell-fish shall be thoroughly washed with cold water of an assured purity. Attention is directed to the requirements of the U.S. Bureau of Chemistry as to water content of oysters, in connection with possible "soaking" during the washing process.

- (h.) *Waste-disposal*.—Shells, washings, and other wastes shall be disposed of in such manner as not to cause a nuisance.

#### IV.—Communicable Diseases.

- (a.) *Examination of Employees*.—All applicants for employment shall be inspected to observe any evidence of active infection and questioned as to whether the applicant has previously suffered an attack of typhoid (or paratyphoid) fever, or has recently been in intimate contact with any such case. This examination should preferably be made by a physician, but if this is not practicable it shall at least be made by an intelligent and competent person under instructions from the Provincial Board of Health, or local Health Department, and all suspicious cases shall be referred to a physician. No person who has any communicable disease or any infected wounds on the hands or arms, shall be employed or retained in any shucking or packing plant.
- (b.) *Examination of Carriers*.—In the case of an individual giving a history of a previous

attack of typhoid fever or suspected typhoid fever (or paratyphoid), bacteriological examination of stools and urine, in the laboratory of the Provincial Department of Health or in such other laboratory as the Department may designate and approve, shall be required. Any carriers of typhoid (or paratyphoid) bacilli thus detected shall be excluded from employment.

Only the following paragraphs, lettered as above, shall apply to plants handling shell stock exclusively:—

I. (a), (c), (d), (f).

II. (a), (c).

III. (a), (b), (h).

IV. (a), (b).

#### 9. Shipping.

- (a.) *Shell Stock*.—(1.) Shell oysters and clams shall be handled and shipped under such temperature conditions as will keep them alive. It is recommended that the temperature be kept below 50° F., but above freezing. (Detailed instructions to this effect should be printed on the barrel, sack, or tag.)

(2.) Shell oysters and clams shall be packed in clean barrels or sacks plainly marked with the name and address of the shipper and the name and address of the consignee, together with the name of the place of origin and the certificate number of the shipper.

- (b.) *Shucked Stock*.—(1.) Shucked stock shall be stored and shipped under such temperature conditions as will prevent spoilage. Outside containers shall be provided for ice, and no ice or other foreign substance shall be allowed to come in contact with the shell-fish. (It is recommended that shucked stock be kept at a temperature of 50° F., or below, from the time it leaves the shipper until it reaches the consumer, but that it be not allowed to freeze.)

(2.) Shucked oysters and clams shall be packed and shipped in containers sealed in such manner that tampering is easily discernible, and marked with the identification-mark of the shipper or packer. Shipments shall be so tagged or labelled as to show the name and address of the consignee, the name and address of the shipper, the name of the Province of origin, and the certificate number of the shipper.
